

 **PICOSTONE™**
Smart Homes Simplified

A Little About Picostone

We are a startup based in Mumbai. We are young and have a passionate team from diverse fields driven with a common mission to automate every home in India. We believe in delivering an affordable product range, prioritising user experience & to have a meaningful impact in your life.

Our Vision -

To make every home a Smart Home. With our solutions and engineering we want to make living at homes more convenient, energy efficient and connected.

Our Mission -

To convert 1 Million Home to Smart Homes.

Why Picostone?

Retrofit and Economical Solutions

We've designed our products to fit into any home without any need to rewire or labour work. Our solutions are extremely economical and efficient.

Control and Monitor Your Home from Anywhere

Our solutions give you the power to control and monitor all your home appliances from your smart phone from anywhere in the world.

We Innovate Everyday

Our engineering team is constantly innovating to improve user experience and develop amazing new features for the same.

We Own the Complete Engineering Stack

We've put in thousands of hours to build and develop the entire hardware and the software that makes Picostone products so great.

Products are Designed, Developed and Made in India

All our products are designed and developed in-house, and manufactured in India itself. We strongly support the "**Make in India**" belief.

OUR PRODUCTS

Picostone Basic - 4 Channel

Picostone Basic is a smart device that fits behind your switchboard, making it smarter and helps you control your appliances over the WiFi from your smartphone. It gives you the flexibility to control upto 4 switches including tubelights, fans & LEDs (dimmable & non-dimmable). You can carry your switchboard on your phone.

Voice Control your Home

Your appliances, now obey your command, quite literally. Picostone devices seamlessly integrate with Amazon's Alexa, to enable you to control your appliances with your voice commands.

Picostone is now integrated with **Alexa**,

Use commands like -

- "Alexa, turn the main light Off"
- "Alexa, dim the bed lights to 50%"
- "Alexa, I am Home"
- "Alexa, Turn Television ON"
- "Alexa, Switch to channel 243 on Tata Sky"
- "Alexa, reduce temperature on AC by 3"

And **#LiveEffortlessly**

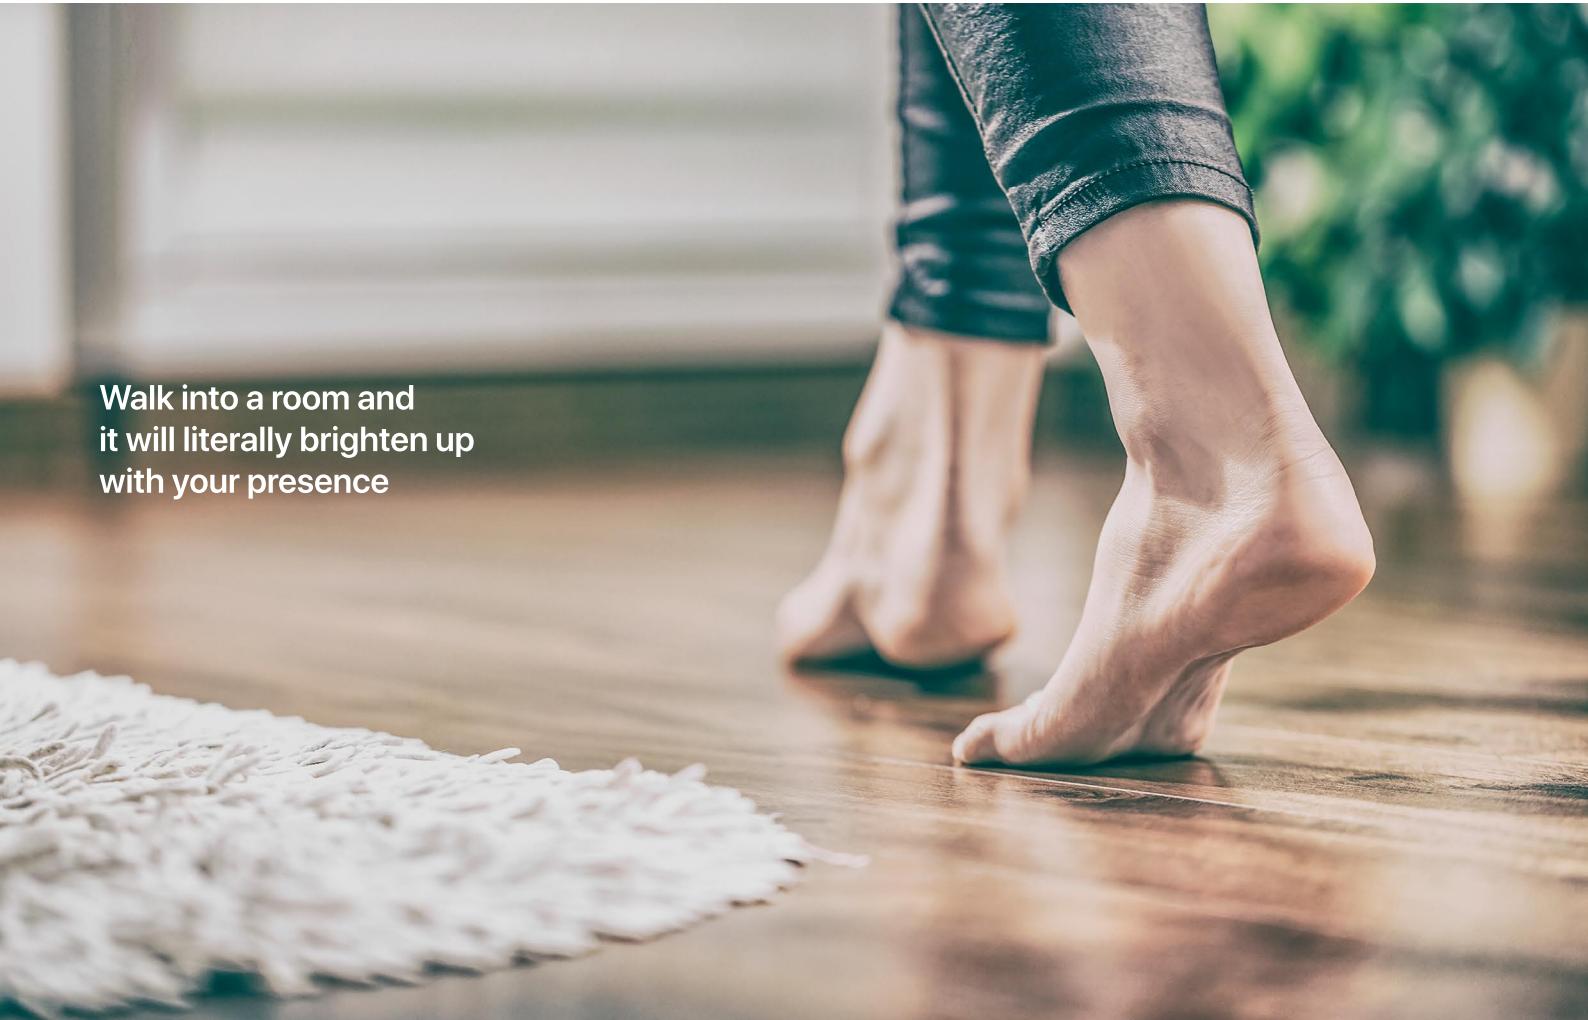

Motion Sensor Integrations

We bring to you a convenient way to control your appliances, Motion Sensors.

You need to integrate motion sensors with Picostone products which gives you the power of controlling your appliances with your mere presence (or absence in some cases). The installation process is quite simple & requires no rewiring. It hosts 360 degree detection range wherein it scans the entire room & if no one is present in the room the lights will be triggered to switch off. Further, it makes your house energy efficient and fancy.

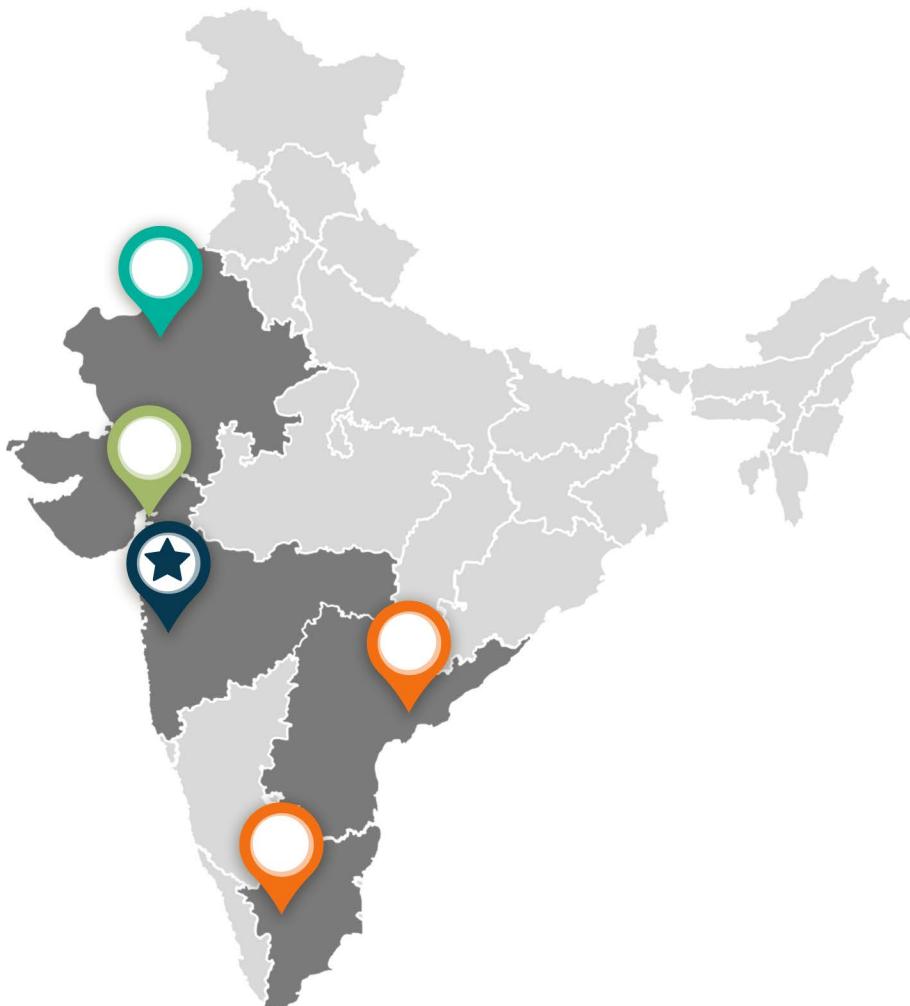

Upgrade the way you control your appliances with Motion Sensors.

Walk into a room and
it will literally brighten up
with your presence

Our Presence

Over the past 2 years, Picostone has grown aggressively, with a strong and trusted sales network and a great product. With a vision to automate every home in India, we are on-boarding new happy users everyday, and making lives effortless, and homes smarter.

What our Customers say about us!

Home automation by Picostone-
Installation = 15 minutes.
App configured with a couple of clicks.
Really well thought out..

Damn @picostoneTech . As if I needed more reasons to be lazy! Now dont even have to get up to switch off the lights. Sab app par.

Convenience at its best. I have the complete control of my office on my phone. The Pre-Cooling feature is my personal favorite. Amazing product
